Headline:

StockTrack software provides full shareholder management for crowdfunding initiatives, self-issuers, and commercial transfer agents.

Summary:

Crowdfunding and the reduced costs and complications of capital funding, thanks to the JOBS Act, means that many companies are finding it cost effective to raise capital. This increased activity is creating more demand for easier ways to handle shareholder accounting in-house. Figtree software, which just announced the release of version 14.52 of StockTrack shareholder accounting software, is ready for this increased demand and continues to be ahead of the industry in providing the features and support needed by self-issuers as well as commercial transfer agents. The latest version adds new functionality, reports, and features to simplify, automate, and expand stockholder bookkeeping. New features include new reports; tools to support crowdfunding, additional cost basis reporting, new features for S-Corps; and much more.

Morris Plains, NJ, May 25, 2012

The JOBS Act, which will raise the threshold under which companies will need to register an offering, brings increased interest in companies managing their own Shareholder Accounting. StockTrack software, the leading product in the stock transfer field, adds new features in version 14.52 to help both self-issuers, commercial transfer agents, and crowdfunding programs easily manage stockholder bookkeeping -- issuance of stock, handling of cost basis, corporate actions, proxy, and more.

“StockTrack currently has the largest number of bank and bank holding company licensees of any shareholder accounting software. The new features make it even more attractive to these groups as well as other self-issuers and commercial transfer agents” according to company President Abby Rosenstein.

Version 14.52 continues the **StockTrack** tradition of providing many useful enhancements to this shareholder accounting package with each release. **StockTrack** provides a complete and cost effective Transfer Agent solution. The software supports issuance and transfer of stock, printing of stock certificates, cash dividends (including generating NACHA files for direct deposit), dividend reinvestment, proxy voting and reporting, stock splits, and all related reporting as well as support for tax reporting. It is in use by Commercial Stock Transfer Agents and Self Issuers, including S-Corporations, across the U.S.

Current licensees consider **StockTrack** the most complete and cost effective product available. They cite ease of use, extensive feature set, reports on all aspects of shareholder accounting, flexibility, cost basis information, audit trails, reasonable pricing and great support as reasons they are happy that they selected and use **StockTrack**. Licensees report that **StockTrack** is “the easiest to use” shareholder accounting software. They particularly like the system flow which makes the software easy to learn and use.

There are more than 100 reports on all aspects of shareholding accounting including stock ledgers; certificate registers; transaction journals; pro-rata ownership, K-1 Reporting, insider trading and insider ownership; dividend and split reporting; dividend reinvestment; proxy voting and voting card support; warrants and options; and company overview of outstanding shares. In addition, statements, confirmations, and cover letters can be printed in ready-to-mail formats. Many reports are available as Excel spreadsheets as well as formatted reports.

Go to www.stocktracksoftware.com to obtain this software free for evaluation, request an invitation to a live feature demonstration over the Internet, or view a five minute pre-recorded **StockTrack** overview. Contact **Figtree Software**, 973-539-9311 ext. 7027 or by email to stock@figtree.com for more information.

All **StockTrack** licensees who are current on software maintenance and support are entitled to this update. Go to www.stocktracksoftware.com to download.
